Youth participating in Exploring

1,600

Youth enrolled in the Aviation career field

89

Aviation posts across the country

OPPORTUNITY

The aviation industry is currently facing a shortage of pilots, aircraft mechanics, and engineers. The number of active pilots has been declining for the last 30 years.

Aviation Exploring combines classroom training with hands-on experiences on what it's like to be a pilot, aircraft mechanic, air traffic controller or other aviation professional.

PARTNERSHIP GOALS

30

Charter 30 new Aviation Exploring posts nationwide

Encourage High Schools using AOPA's aviation STEM curriculum to start Aviation Exploring posts

Connect High School training with real-life experience in the field

30%

Increase Aviation Exploring enrollment by 30% in 2018

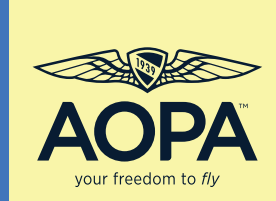

Grow pipeline for upcoming Aviation professionals

Promote partnership with AOPA to all Exploring posts nationwide

Conclusion: a partnership with Aviation Exploring will help to develop and train the next generation of aviators and aviation professionals by providing hands-on experience to youth.

Conclusion: a partnership with the AOPA will increase participation in Aviation Exploring across the country, helping to grow the program for years to come.
