

NATIONAL PARTNER

EXPLORING™
DISCOVER YOUR FUTURE

The Society of American Military Engineers leads collaborative efforts to identify and resolve national security infrastructure-related challenges.

Founded in 1920, SAME unites public and private sector individuals and organizations from across the architecture, engineering, construction, environmental and facility management, cyber security, project planning, contracting and acquisition, and related disciplines in support of national security.

A MESSAGE FROM SAME
SAME is proud to build upon our long-term relationship with BSA and LFL in mentoring young people to explore becoming engineers. Our joint summer camp program, the Exploring Engineering Academy held on the Georgia Tech campus in Atlanta, allows SAME posts to work with Exploring posts to create unique STEM programs that inspire young students to pursue careers in engineering. SAME and Exploring support similar joint opportunities across the United States because together we can do more.

105 The number of SAME chapters around the country

PARTNER LEVEL

SUPPORT
The Society of American Military Engineers recognizes Exploring as a mutually beneficial program to both its own branch chapters and to the youth who are the future workforce of America.

GROWTH
The Society of American Military Engineers encourages its member chapters to contribute to the development of youth by sponsoring an Explorer post or club in their own communities.
